ECONOMICAL BOWED ROLLS FROM WEBANCOR

UTILIZING MODULAR TECHNOLOGIES AND MODERN CNC MACHINES **WEBANCOR** PRODUCES A LINE OF ECONOMICAL BOWED ROLLS FOR STANDARD USES, WITH QUICKER DELIVERIES.

Using **3", 3 1/2", 4", and 4 1/4" diameters** as standards that cover most retrofits, we stock most of the internal parts for these sizes, allowing us to give the best prices and deliveries. We just need to produce the standard sleeve, to the length required, in our own rubber shop, and bend the center bar. These diameters are recommended for face lengths up to about 80" with standard web tensions.

Longer lengths and high tensions will require larger diameters with heavier center bars.

We can provide standard pillow block or flange type mounts for these sizes or drill and tap the ends for frame mounts. "Light duty" mounts shown in picture.

Any custom diameter including metric can be supplied at added cost and delivery times.

We have made most sizes from 1 1/2" dia to 9" dia. and lengths up to 20 feet. Other diameters can be arranged.

Heavy duty mounts are recommended for long spans and are priced accordingly.

These industry standard diameters can be manufactured with shaft extensions to retrofit any manufacturers bowed roll, so that only the bowed roll needs to be purchased and using existing mounts.

Manufactured in Canada and shipped around the World.

Sales offices in Canada, USA, Europe and Indonesia

WEBANCOR MANUFACTURES THE FOLLOWING PRODUCTS

AIR SHAFTS: Core shafts for any size core inch or metric from 1” to ?
Bodies of Aluminum, Steel, carbon Fiber
Unwind, Rewind, Lug, button, leaf types
Center wind, surface wind, with bearings, bushings,
For safety chucks.
Round, square, hexagon, pin and other type drives

MECHANICAL SHAFTS: Standard core sizes, shafts manufactured to order.
Aluminum, steel and Carbon Fiber bodies

AIR CHUCKS: Air expansion chucks for common core sizes in inch and metric
Aluminum body, Leaf, lug and tire type grippers
Shafted and shaftless
Single, double and triple lengths in one chuck.

MECHANICAL CHUCKS: For both shafted and shaftless operations.
Leaf, lug, and pad type grippers.

BOWED ROLLS: Fixed and Fully Adjustable
Foot or flange type mounts
Custom mounts, drilled and tapped center bar
Custom sealing of end bearings.
Long life lubricated low friction bearings
Special compound sleeves available

IDLER ROLLS: Live or dead rolls
Steel, aluminum, and composites
Long life bearings.
Balanced for all speeds

AIR SHAFT BLADDERS: Bladders available for ALL MAKES of air shafts
Manufactured in our plant with rubber compounded
especially for airshaft use.

**SUPPLYING MACHINERY BUILDERS AND END USERS AROUND THE WORLD
SERVING THE WEB CONVERTING INDUSTRIES**
