WEBANCOR LR-3 CORE CHUCKS

The **WEBANCOR** LR3 Core Chucks are available for 3" dia cores, and with bore sizes to fit up to a maximum of 1 3/8" dia. shafts. They have tire type inflating grippers, that will grip, paper, plastic or metal core materials.

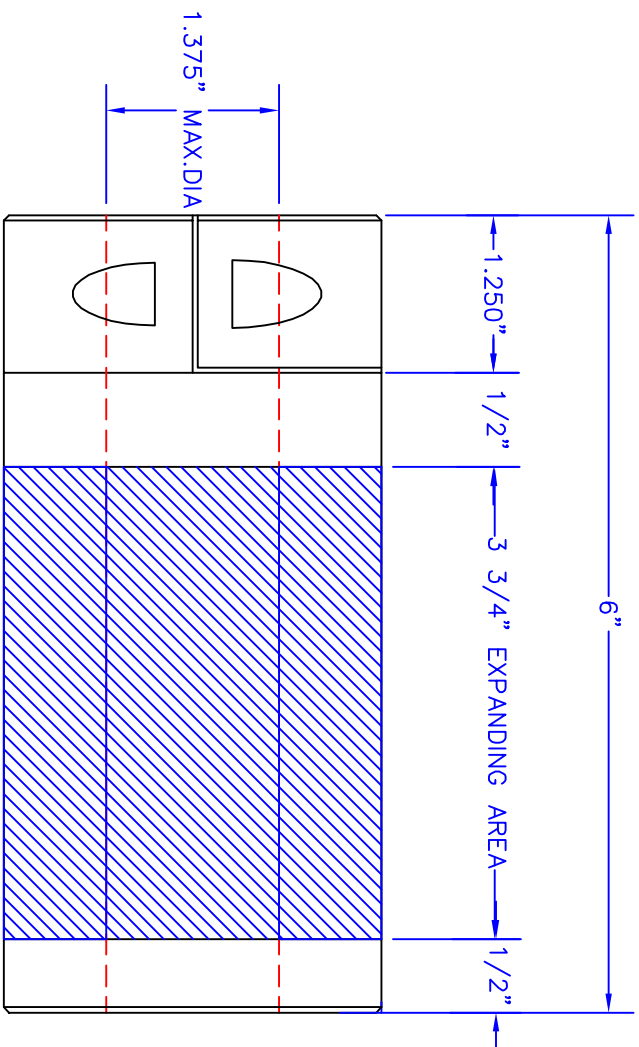

These Chucks are quite often used on Narrow web machines, either on and bar shaft, or as stand alone core holders using stubb shafts. The split collar clamp is designed with steel thread inserts.

Easily replaceable bladder system, with parts available from stock in Toronto for immediate shipment around the world.

AIR INFLATING TYPE CHUCKS

A full range of core chucks are available, produced on modern CNC machines. Standard rubber tire type grippers available as standards in 3", 4", 5" and 6" core sizes. Lug type available in many sizes and shafts. Inch and metric sizes are custom made.

CORE SHAFTS, CHUCKS and BOWED ROLLS.
Sales offices in Canada, USA, Europe, Indonesia

The WEBANCOR LR3 is a air expanding chuck for 3" dia. cores. This chuck is designed to operate on a through shaft with a max. dia. 1 3/8". These chucks are for light duty applications. For heavy duty applications use either an Air Shaft or a mechanical locking chuck. Air pressure locks the core into place and the load therefore is dependent on the air pressure available. Check with WEBANCOR for the application.
